

HEAT EXCHANGE AND TRANSFER, INC.

500 SUPERIOR STREET, CARNEGIE PA 15106

PH.# 412-276-3388

FAX # 412-276-3397

Thermal Fluid System: Inquiry Form FOR PLATENS & MOLDS

A. Customer Information:

Company Name: _____

Company Address: _____

Contact Name: _____

Phone #: _____ Ext.: _____ Fax #: _____

B. Process Equipment Parameters:

User Equipment Description (e.g. platen press type, etc.):

Platen or Mold Material: _____

Type of insulation: _____ Thickness: _____ in.

What areas of the Platens or Molds are insulated? _____

Number of Platens or Molds: _____ Platen or Mold weight: _____

Platen or Mold dimensions: Length: _____ in, Width: _____ in, Thickness: _____ in

Number of flow paths through Platen or Mold: _____ Size of flow paths: _____ in

Length of flow path: _____ in. Total volume of flow paths: _____ gallons

Pressure drop through each Platen or Mold: _____ psi @: _____ gpm

Size of inlet manifolds to & from the Platens or Molds: _____ in, Outlet: _____ in

Volume of manifolds: _____ gal.

C. Product Specifications:

#1 Material name: _____
Specific Heat: _____ Btu/lb-°F Weight of material: _____ lbs or lbs/hr
Initial temperature: _____ °F, Final temperature: _____ F/min

#2 Material name: _____
Specific Heat: _____ Btu/lb-°F Weight of material: _____ lbs or lbs/hr
Initial temperature: _____ °F, Final temperature: _____ F/min

HEAT EXCHANGE AND TRANSFER, INC.

500 SUPERIOR STREET, CARNEGIE PA 15106

PH.# 412-276-3388

FAX # 412-276-3397

D. Process Parameters:

Operation: Batch (e.g. tanks or vessels) Continuous (e.g. extruders)

Operating temperature of the user equipment: Initial: _____ °F, Maximum: _____ °F

Heat up time required for initial start-up: _____ (hours or minutes)

What temperature gradient is required on the Platen or Mold? _____ °F

Is cooling required? Yes No

Cooling required for: Set point Cool down Exothermic

Cooling control: On/Off Proportional

Cooler Sizing (if applicable):

Continuous: Remove: _____ Btu/hr @: _____ °F using: _____ (media *)
at: _____ °F and: _____ gpm

Batch: Remove: _____ Btu's in: _____ hrs/mins using: _____ (media *)

(* - Air, water, chilled glycol, etc.)

E. Thermal Fluid System Parameters:

Heat Transfer Fluid: _____

Operating Fluid Temperature Range: Minimum: _____ °F, Maximum: _____ °F, Normal Operating: _____ °F

Heater Sizing: _____ kW or: _____ Btu/hr (if known)

Flow Rate: _____ @: _____ ft of Head (if known) Open Skid Sheet Metal Enclosed

F. Installation Parameters:

Distance between fluid system and process equipment: Horizontal: _____ ft., Vertical: _____ ft

Piping between fluid system and process equipment: Size: _____ in, Schedule: _____ in, Length: _____ in.

Type of fluid piping Insulation: _____, Thickness: _____

Ambient temperature at installation site: Minimum: _____ °F, Maximum: _____ °F

Area Classification or NEMA rating: _____

If hazardous, is air purging acceptable? Yes No

G. Available Utilities:

Power Available:	_____ Volts	_____ Phase	_____ Hz	_____ Amps
Air:	_____ °F	_____ psig	_____	_____ SCFM
Nitrogen:	_____ °F	_____ psig	_____	_____ SCFM
Steam:	_____ °F	_____ psig	_____	_____ lb/hr
Water:	_____ °F	_____ psig	_____	_____ gpm
Thermal Oil:	_____ °F	_____ psig	_____ gpm	_____ Type
Other:	_____ °F	_____ psig	_____ gpm	_____ Type

H. Please list any requirements that may affect the design of this equipment:
